All the Vaccines Are Contaminated – Every Last One of Them

DECEMBER 9, 2011 BY ADMIN 13 COMMENTS

By S. Edmonson for Salem-News.com

“The chief, if not the sole, cause of the monstrous increase in cancer has been vaccination” – Dr. Robert Bell, once Vice President International Society for Cancer Research at the British Cancer Hospital

(WASHINGTON, D.C.) – Have you been rushing out to get a yearly flu vaccine or diligently taking your children for the 40 or so mandated childhood vaccines?

That's really a shame because you have unwittingly been trading a run-of-the-mill flu or just the measles, for loading up your or your children's bodies with cancer and other deadly viruses, a destructive bacteria, a chemical selected to damage fertility, and with synthetic DNA that threatens to damage your own DNA – the biologic code for your existence.

Who is saying the vaccines are contaminated?

Vaccine Contamination

None other than the (now deceased) head of vaccines at Merck, **Dr. Maurice Hillerman**, who [on camera](#) admitted that Merck's Hepatitis B vaccines, contaminated with a virus, caused the AIDS epidemic in the US. He went on to say that all of Merck's vaccines are contaminated with cancer and other viruses. (The US government has [conceded the HEB B vaccine causes Lupus](#). That vaccine is mandated for every infant in the US on the day of birth, and is associated with MS as well.)

That vaccine is mandated for every infant in the US on the day of birth, and is associated with MS as well.)

For Jews who have almost religiously believed in medical authorities about vaccines and poo-pooed those worried about the safety of vaccines, they might want to notice that Hillerman was Jewish.

Or they might recognize that so is **Dr. Larry Palevsky**, [a board certified NY pediatrician](#), who for ten years routinely gave vaccines to his patients until he noticed them losing eye contact and then began looking into the vaccines he had blindly trusted. He found that they are ALL contaminated with viruses that are so small they can never be removed. He no longer gives any vaccines. He now treats his young patients for autism and other neurologic injuries from vaccines.

Donald W. Scott, the editor of The Journal of Degenerative Diseases and the co-founder of the Common Cause Medical Research Foundation, links vaccines to AIDS (as did Hillerman) and to US bio-weapons research, and says they are contaminated with mycoplasma, a primitive bacteria that takes apart cell walls.

Perhaps the highest scientific authority saying vaccines are contaminated is Garth Nicolson. He is a cell biologist and editor of the Journal of Clinical and Experimental Metastasis, and the Journal of Cellular Biochemistry. He is one of the most cited scientists in the world, having published over 600 medical and scientific peer-reviewed papers, edited over 14 books, and served on the editorial boards of 28 medical and scientific journals. He is not just saying that vaccines are contaminated with mycoplasma but is [warning the US](#) that they are. Nicolson goes further and says that we are all being damaged by them and contracting chronic degenerative diseases that.

[That damage translates into lifelong patients](#) (and thus life-long profit) for the pharmaceutical industry making the vaccines and he says doesn't appear to be accidental.

Ok this is killing me . I have a 13 month old son. I have lost sleep over the issue of wether to vaccinate my son or not . I have talked to people that are for and against vaccinations and all of them are convinced they know what they are talking about . Im pleased to have found this web site ,and I have so many unanswered questions . Up to this point my son has been vaccinated ,I have kicked and screamed the whole way because my gut instinct is against it . My sons pediatration is very adoment about vaccinating and is very pushy on the subject. to the point he has said " He is sick and tired of irresponsible parents who choose to put their children and children around them, in harms way because of conspiracy theorns and is thinking about dropping his services to anyone who opts out of vaccinating their children." When I took my son in for his twelve month vaccinations, I was sick to my stomach, I felt like something was wrong, as we waited for the nurse to come in with the shots, my son communicated with me for the first time. He started crying and pointing towards the door saying momma ,bye-bye, bye-bye momma, its almost as if he knew something bad was ging to happen to him ,I cried and cried ,tried to muster up the courage to leave but because I didnt want my doctor to be angry with me i cowardly let them administer the vaccines. I cant stop thinking about if I made a critical mistake by not listening to my gut instinct and my sons cries. So now what? What's done is done. IS IT TOO LATE ? Is my son ruined on the inside ? Can I fix this? He has many more vaccines coming up in the near future . Should I opt out of ALL VACCINATIONS or just some? wich ones? Im so confused and afraid. He is my only child,my whole world, and I dont know what to do IS THERE ANYONE WHO COULD EDUCATE ME MORE ON THESE ISSUES ? please anybody...enlighten me please?

Please...se listen to your gut instinc...king to you and telling you...are are ways to reverse the damage by way of detoxification and homeopathics, but you have to stop listening to your doctor pushing Nazi medicine on your doctor says he will drop you as a patient, that is a very good thing, it shows that he is not in the right state of mind to know your child healthy. Seek out a Homeopath or Naturopath. There are so many poisons in the vaccines, how can you expect

Select Month

called Homeopathic Nosodes and will protect your child and not harm him ever.

Ally,
Stop immunizing now... no more... I have not been immunized and my 4 grown sons have not been immunized... we use food (starting with a couple years of breast milk), plant medicines and homeopathy for health... Your child is meant to live their life without immunization and mutilization (circumcision). Begin now to live free of big pharma. You have the right to not be injected. You have personal freedom and can enroll your children in public schools under this reason... deeply personal and/or philosophical/religious beliefs. Use homeopathy to help the body remove the toxins already received. Be well.

I vaccinated my first born at the age of 3 months- against my gut instinct. That night she woke up with a very eerie scream. By the time she was 6 years old she had bad asthma and was on a nebulizer twice a day. A couple of times, Prednisone.
I found Dr. Fuller Royal of The Nevada Clinic in Las Vegas when she was 8. He asked me before I indulged the information, had she been vaccinated? He proceeded to de-tox her and her asthma improved quickly from then on.

Ally Redman,
I would definitely look into having some Dr. Marshall mudpacks done for your child. They are a great solution for those of us who have already been vaccinated throughout our lives, like when we were children and had no choice in the matter... I encourage you to do some research on Dr. Marshall (he created these mudpacks) and then find a QRA practitioner in your area, many of which have a mud spa (or can give you products and instructions on how to administer the packs but I highly recommend having them done in a spa if at all possible). The mudpacks are great for any injury or vaccination site because toxins begin to build up there, and this traps the vaccination residues there as well. The mudpacks release all these toxins and the trained professionals should also help aid your body in assisting the toxins out (by drinking various liquid supplement mixtures they are trained to give either before, during, or after the mudpacks). I also recommend seeing a QRA practitioner on a regular basis to make sure the residues are fully detoxed out of the body over time and don't just sit in the liver, etc.

I don't have kids yet but I feel a sliver of your anxiety over this issue. I am getting married in March and have had some conversation about the issue of vaccinating our future kids or not with my fiance, and praying that we will be able to come up with the right decision. The more I learn about them and after seeing what a huge detriment to my own health they were, and the difference in health I had once I had the vaccination sites mudpacked, I am convinced more than ever now that they are not the right way to go. My practitioner hasn't allowed one vaccination to be administered to her daughter who is now 7 and has had TWO colds her entire life 😊 Her mother (the practitioner) had strep 8 times by that age and went on to have many serious health issues (which are now resolved ever since she studied alternative medicine, healed herself, and became an amazing practitioner in the east bay area of northern California).

Best of luck to you, my thoughts and prayers are with you as you figure out what God wants for you and your family.
Gina

I would not have your children take immunizations. Government will admit that some people will have allergic reaction and you never think it will happen to you except when it does. 2010 my son was going into 6th grade and got the basic shots. Two days later my son began to lose his hair. He was diagnosed with Alopecia Areata which is losing your hair. I went to a dermatologist and he gave him two rounds 15 shots of steroids which made him sick to his stomach and head aches for months. he missed 21 days of school the first semester and about 22 days second semester
After going to dr to dr I finally went to a homeopathic dr in Phoenix and within 3 months he fixed most everything. this is the short story of a long story. My son still gets occasional headaches and his immune system is not as strong as it should be so we have to stay with the homeopath. Any questions about Alopecia Areata conta ct me at mrbrophx@hotmail.com

Came back from doing physical.
I had all the basic shots when I was a kid.
And today while doing physical the doctor told me my Hep B Vaccine that I had when I was a child didn't work or doesn't work anymore. The doctor asked if I wanted to get Hep B vaccine. I told her I would think about it.
I have a very healthy life and am a Dietitian as well as a weightlifter. My answer for her now would be...No thanks on the Vaccine.
Hepatitis B is transferred just like any other "STDs" which is through blood, semen, and dirty cuts (essentially blood) transmissions. Hepatitis A can be rid of naturally.
Funny how this article would talk about Vaccines/AIDs relationship when HIV transmission is also through Blood, Semen, and dirty cuts.
